

Plant Sale List

June 1, 2019 9:30am-1:30pm

Lurie Garden's Annual Plant Sale selection features perennials inspired by the garden's design and provides food and shelter for native pollinators and local fauna. With plants native to the Chicago region to choose from, you don't have to have a garden to have a plant that benefits native pollinators! Putting just one plant on your balcony or porch can be a place for friendly pollinators in need of rest and food!

Lurie Garden staff and volunteers will be on hand to answer questions about your plants or garden project.

Members at the Aster-level and above receive 10% off their Lurie Garden plant purchase. All plant sale proceeds support Lurie Garden public programs.

Please bring your own bags or boxes to transport your plants.

 Native to US Midwest

Sale plant list will be updated, with additions, by May 29.
